

Infant April 2025

April showers bring May flowers, green grass, budding trees, and infants who look at spring with curious eyes! As the environment changes with the warming weather, animal life changes, too. Baby animals appear, pond animals emerge, and tadpoles turn into frogs. Your infant will look at the changing environment in our classroom this month.

In the first week of the month, we'll be focusing on baby animals, from chicks and bunnies to kittens and puppies. Next, we'll learn about turtles and frogs! As we wrap up April, your infant will experience the gardens and picnics that celebrate springtime.

We will continue to foster the thinking skills and language development of your infant through reading books, enjoying one-on-one time, and having conversations with your child throughout the day.
